MINISTRY OF HIGHER EDUCATION, SCIENCE,  
RESEARCH AND INNOVATION (MHESI), THAILAND

## Preface

“Study in Thailand 2022” is the guidebook of international programs offered by higher education institutions in Thailand. The purpose of this publication is to provide readers with an overview of each Thai higher education institution on its international programs in 2020-2021, qualifications of applicants, tuition fees, and accommodations. This publication also presents related data on Thai higher education and an updated list of higher education institutions with contact details for further information and cooperation.

The publication was prepared during the pandemic of COVID-19, thus we would like to express gratitude to all Thai higher education institutions for their invaluable support and contributions. As new international programs are usually changed and developed, we suggest readers check each institution’s website or contact the institution directly to ensure that you have the most up-to-date information.

We hope that “Study in Thailand 2022” will be useful for all readers, especially for those who wish to further study in an international program in Thailand.

## Thai Higher Education

Ministry of Higher Education, Science, Research and Innovation (MHESI), Thailand was created on May 1, 2019. MHESI is a merger of government departments, which have various legal functions and powers namely the Ministry of Science and Technology, the Office of the Higher Education Commission (formerly under the Ministry of Education), the National Research Council of Thailand and the Thailand Research Fund. It is a government agency that established established to meet the country's mobility through the creation of an innovation-based economy and prepare the Thai people to support important challenges in the 21 century.

MHESI is a model ministry of a new type of ministry that is linked to the mission of policymakers. Coordination and support in higher education, science, research development, innovation, and competition in business along with people development, respond to the 20-year national strategy and Thailand 4.0 policy.

For Higher Education, MHESI is responsible for overseeing higher education provision and promoting higher education development on the basis of academic freedom and excellence under the direction of the Ministry. MHESI's mandates include formulating policy recommendations and higher education development plans, establishing higher education standards in accordance with international standards, providing recommendations on mobilization of resources for higher education development, monitoring and evaluating outcomes of higher education management as well as inspecting and evaluating the higher education management of each degree-granting institution in Thailand along with considering issuance of regulations, criteria, and official orders as deemed necessary.

Thailand currently has a total of 154 higher education institutions, including 84 public higher education institutions and 70 private universities. There are 10 traditional universities (including one community college with 20 campuses), 27 autonomous universities, 38 Rajabhat universities, and 9 Rajamangala universities among the public higher education institutions.

### Higher education policies

1. The 15-year plan on higher education (2008-2022) focuses on enhancing the quality of higher education and lifelong learning process. The goals are to ensure the higher education sector's ability to produce high-quality graduates and develop a labor market workforce.
2. The 20-year plan on higher education (2018-2037) focuses on reforming higher education system, particularly in higher education administration and outcomes within current and future contexts and future global changes.
3. Thai Higher education plan on building and developing manpower (2021-2027) emphasizes human development and capacity building, research ecosystem building and higher education transformation. Human development and capacity building focuses on developing manpower with competencies and the country's needs. In addition, it stresses

the importance of digital technology in promoting education accessibility. The Ministry categorizes research into three groups on the research promotion issue: research to address social issues, research to enhance competitiveness, and research to strengthen community and reduce disparity. The higher education reform aims at developing higher education institutions based on each one's strength and role in the country and community development.

4. The Higher Education Plan for Manpower Planning and Development (2023-2027) is a revision of the 2021-2027 Higher Education Plan, taking into account recent changes taking place in Thailand and across the world, as well as the alignment with the Science, Research and Innovation Plan (2023-2027). The revised plan also contains an improvement in the budgeting process and administration that will facilitate policy deployment and annual budget planning. The 2023-2027 Higher Education Plan also consists of 3 strategic areas: 1) lifelong learning 2) research ecosystem building and 3) higher education transformation. The plan is set into two phases: phase I (2023-2025) focusing on supporting the pandemic recovery and phase II (2026-2027) emphasizing sustainability.

### **Educational standards and quality assurance**

1. According to the Ministerial Regulation on Educational Quality Assurance B.E. 2561 (2018), each level and educational type is subjected to be assessed, monitored, and audited by the Office for National Education Standards and Quality Assessment (ONESQA). The assessment is based on five areas as indicated in the Ministry of Education Announcement on Higher Education Standards B.E. 2561 (2018):

- 1) learner outcomes
- 2) research and innovation
- 3) academic services
- 4) arts, culture and Thai identity
- 5) instructional management

2. Quality Assurance Systems consist of the External Quality Assurance (EQA) and Internal Quality Assurance (IQA). The EQA is conducted by ONESQA as mentioned above. The Internal Quality Assurance (IQA) has been prepared in the self-assessment report. The report consists of the assessment of study program, faculty and institution. MHESI has developed and utilizes the QA online system as a central QA database. The system facilitates all HEIs to prepare the self-assessment report more systematically. In addition, MHESI has constantly encouraged Thai HEIs to work in collaboratively with leading institutions around the world to heighten the recognition of instructors and programs, as well as to enhance quality and foster internationalization of Thai higher education.

3. Thai Qualification Framework (TQF), it has been implemented since 2009, and become an overarching framework for Internal Quality Assurance (IQA) It covers six levels of higher education. There are five domains of learning outcomes:

- 1) ethical and moral development
- 2) knowledge
- 3) cognitive skill
- 4) interpersonal skill and responsibility
- 5) analytical and communication skills

These domains serve as a minimum standard requirement for a qualification framework of each area of study. Apart from the national framework in higher education policy, MHESI also adopts the UNESCO 2030 agenda for sustainable development by supporting inclusive and quality education and promoting lifelong learning for all.

## **International Education**

There are many international programs in Thai Higher Education Institutions both undergraduate and graduate levels including certificate programs. In 2021, Higher Education Institutions in Thailand offered 1,151 international programs using English as the medium of the instruction at undergraduate and graduate levels.

## **Academic year and enrollment requirement**

**First Semester:** June-October

**Second Semester:** November-March

## **Undergraduate program requirements**

Undergraduate degree programs applicants must complete upper secondary education or the equivalent of grade 12 to apply for a bachelor's degree in Thailand. In some cases, the examination is required and followed by an interview.

## **Graduate program requirements**

Graduate degree programs applicants must complete undergraduate degree or equivalent. They have to send documents to the university and for some programs, the applicants are requested to take the additional examination as GRE or GMAT including the interview.

## **Registration**

Students usually enroll at least 9 credits but no more than 22 credits per semester for undergraduate programs. Graduate students are required to take between 9 and 15 credits for a semester. The process of registration must be completed before the class starts.

To obtain a bachelor's degree, students must study not less than 120 credits and obtain a minimum grade point average of 2.0. For the master's degree, students must study not less than 36 credits and obtain at least a 3.0 grade point average to achieve the degree. The doctoral degree program requires candidates with a bachelor's degree to complete a minimum of 72 credits while master's degree holders must complete the program with a minimum of 48 credits.

## Grading and Examination

Thai higher education uses a letter grading system in undergraduate and graduate programs. The grading system can convert as grade point as follows:

Grade	Meaning	Grade point
A	Excellent	4.00
B+	Very good	3.50
B	Good	3.00
C+	Fairly good	2.50
C	Fair	2.00
D+	Poor	1.50
D	Very poor	1.00
F	Failure	0.00
I	Incomplete	
W	Withdrawn	
WF	Withdrawn because of failure	
AU	Audit	

Students must pass intermediate and final examinations each semester. They must obtain at least a cumulative grade point average of not less than 2.00 for a bachelor's degree and 3.00 for a master's and doctoral degree.

**University profile:**

In 2007, Asst. Prof. Dr. Ruangdej Wongla was the President of Chiang Mai Rajabhat University. His policy was to develop the graduates to be excellent in the English language for continuing advancement. He established the English Program that would prepare students to have knowledge, and working fluency in English. It was also an opportunity for the International students to study at Chiang Mai Rajabhat University, and for the English Program to launch other International programs in the future.

After the English Program was established, a large number of students were interested in the program. Chiang Mai Rajabhat University considered establishing the International College to be responsible for international education and international affairs, supporting the university strategy to be excellent in language, and supporting the government policy of being the hub of education in Asia.

**DUSIT THANI COLLEGE**  
*Private university*

Year established: 1993

Number of international programs:

- Bachelor's 2
- Master's -
- Doctoral -
- Others -

**University profile:**

The Dusit Thani Hotel School opened its doors on Srinagarindra Road in Bangkok, under the leadership of Thanpuying Chanut Piyaoui. At that time, Thailand had a shortage of manpower, knowledge and experience in the hospitality industry, due in part to a lack of educational institutes and training programs. Dusit Thani Hotel School was established to meet this need by delivering specialized, practical training for the industry and to support Thailand's developing hotel business. Dusit Thani Hotel School became the first institute in Thailand to be approved for college status and started to offer undergraduate programs.

### University profile:

King Mongkut's Institute of Technology Ladkrabang (KMITL) is recognized as one of the leading pioneers in science and technology education in Thailand. The name "KMITL" was derived from the name King Mongkut (King Rama IV), who is considered to be the "Father of Science" in Thailand. As one of the leading universities in Thailand, KMITL combines outstanding research with an emphasis on active learning skills – crucial success factors for 21st-century educational optimization. We provide our students with innovative and highly competitive academic programs which integrate cooperative training with leading industrial partners and overseas training.

KMITL has an outstanding record of more than 90% graduate employability each academic year. KMITL has raised the bar for science and technology specialization in the region by producing more than 100,000 highly sought-after, enthusiastic and proficient engineers, technologists, and scientists.

**University profile:**

Since its establishment in 1959 by the Royal Thai Government and the Federal Republic of Germany, King Mongkut's University of Technology North Bangkok has grown from a small and single campus to a leading national university of technology, we have a wide network of international academic partners and formal agreements with universities especially with Germany. There are more than 30,000 students across three campuses located in Bangkok, Prachinburi and Rayong province. Founded by the collaboration between the German Government and the Royal Thai Government, KMUTNB has adopted the German model of education which emphasizes on hands-on and practical experience. KMUTNB offers 185 Thai and English programs in certificate, undergraduate, graduate and doctorate levels. In 2020, KMUTNB climbed into the world university ranking lists by subject 2021, which reflects that we are internationally recognized as one of the Thailand's top ten leaders in three broad disciplines, including Physical Science, Engineering and Computer Science.

### University profile:

KMUTT is indeed well known for our innovative programs and strong curricula in science, technology and engineering. In addition, we have developed a reputation for outstanding research, skilled and proficient graduates, distinguished faculty members and effective supporting staff. As the first government institute to become an autonomous university in Thailand, we are better equipped to service the needs of our students and to direct research to real industrial and community issues. Currently, strong emphasis is being placed on knowledge integration, that is, how graduates make use of their acquired knowledge or apply knowledge to practical work situations.

*Autonomous university*

Year established: 1943

Number of international programs:

- Bachelor's 3
- Master's 3
- Doctoral 9
- Others -

**University profile:**

Silpakorn University is a national university in Thailand and presently under the supervision of the Ministry of Higher Education, Science, Research and Innovation. The university was originally established as the School of Fine Arts under the Fine Arts Department in 1933. Its inception and development owed much to an almost lifetime devotion of Professor Silpa Bhirasri, an Italian sculptor (previously called Professor Corrado Feroci), so it was gradually developed and officially accorded a new status and named, Silpakorn University, on 12 October 1943. Now, it offers not only programs in Painting and Sculpture, but also many other faculties as well.

## SUAN SUNANDHA RAJABHAT UNIVERSITY

*Public university*

Year established: 1924

Number of international programs:

- Bachelor's 8
- Master's -
- Doctoral -
- Others -

### University profile:

Originally, Suan Sunandha was once the royal garden in the precinct of Dusit Palace as a place for leisure of King Rama V and the royal family. The name "Uttayan Sunandha" or "Sunandha Royal Garden" was dubbed from name of Indra God's garden in the paradise, and is also the name of King Rama V's favorite and beloved queen - Queen Sunandha Kumareerattana. In the reign of King Rama VI, 32 buildings were built for being the residence of the royal consorts and concubines of King Rama V, including their courtiers. H.H. Princess Saisavali Bhiromya, one of the Royal Consort, founded a lady school "Nibhakarn". aiming to train the royal etiquette and manner for the royal young ladies as well as the ladies from noble families.

The Siamese Coup d'état of 1932 had made a big impact towards the Royal households. A lot of royal members and courtiers resided in Suan Sunandha felt unsecure about the situation, consequently, they left the place. The beauty and splendid of Suan Sunandha, including Nibhakarn School were no longer existed.

It was until the reign of King Rama VIII, the once-decayed Suan Sunandha was back to life. The cabinet had made a consensus to make use of Suan Sunandha space as a lady school named "Sunandha Wittayalai School", transforming the royal inner court to a national education institution, and having been developed and upgraded to Suan Sunandha Rajabhat University right now.

## UNIVERSITY OF THE THAI CHAMBER OF COMMERCE

*Private university*

Year established: 1940

Number of international programs:

- Bachelor's 6
- Master's 3
- Doctoral 1
- Others -

### University profile:

The University of the Thai Chamber of Commerce (UTCC), originally known as the College of Commerce, is the oldest private non-profit higher education institution founded by the Thai Chamber of Commerce in 1940 to provide business education targeting Thailand's young people. It was originally named The College of Commerce. In 1984, the college was granted full university status under its current name.

UTCC's vision is to become the leading university in Trade and Services in ASEAN. It is a place where academic theories and business experiences are integrated to produce graduates who can successfully meet today's business challenges. Furthermore, UTCC has successfully taken on the role of being a think-tank for both the public and private sectors in Thailand. UTCC's services include not only academic programs, but also customized training modules, business consultancy, and research.

"UTCC International College" was founded in 2010. As it grew relatively quickly and consequently widening the scope of its operations, in August 2019 UTCC decided to rebrand it into UTCC – International School of Management (iSM).
